	Milk	weed	Lab Da	ata S	heet				
Site:	Plot Number:		Date: Time:		Plant Source	ID:	Location #:		
Recorder:	Measurers:				Weather:				
Ia: Whole Plant Measures- tak	e all stems of th	e plant into a	account.		Measurer initio	als for this sec	ction:		
# of stems:	# of volunteer s removed from	•	# of leav	/es:		# flowering	g umbels:		
total # of nodes:			# of frui	its:		Fresh fruit mass (g):			
Ib: Largest Stem Measuremen	ts - take only the	largest stem	into account.		Measurer initio	als for this sec	ction:		
Stem height (cm): Largest lea		Largest leaf	length (cm):		Largest leaf width (cm):				
Stem diameter (mm): Largest leaf a			area (Optional: trace on graph paper, mass, calculate; cm2):						
Diameter method: calipers [] t	tape measure []	string []		Area estim	ated/extrapol	ated?	Y[]N[]		
II: Herbivory Estimates-take all stems into account				Measurer initials for this section:					
# of leaves with chewing damage:	Insect-imposed stem damage?	Trench Girdle Other None	Monarch caterpillars	Y[]N[]	Weevils	Y[]N[]	Bees Y[]N[]		
# leaves with weevil damage:	Other stem damage? Weather Mammal Mollusk Unknown None Apex?[]		Milkweed bugs	Y[]N[]	Aphids	Y[]N[]	Spiders Y[]N[]		
# leaves w/ leaf			Tussock moth				Snails/		
miner damage:	Leaf curling?	Y[]N[]	larvae	Y[]N[]	Ants	Y[]N[]	slugs Y[]N[]		
# of leaves with mollusk damage:	Leaf spots?	Y[]N[]	Red milkweed beetles	Y[]N[]	Lady-beetles	1 N [] Y	Japan- ese Beetles Y[]N[]		
If aphids present: color? Select	_ , ,		[] Green/Brown]
