

DECISION-MAKING IN TIMES OF UNCERTAINTY

Kameko Halfmann '10

University of Wisconsin – Platteville

Date: September 27

Time: 3:30 PM

Location: RNS 150

Most decisions we make involve some uncertainty. For example, how do you know you chose the right college to attend? The best partner for life? Or made the best financial investments? Our past experiences, individual differences, and current environment guide the choices we make about the future. In this talk, we will explore factors that may predict or influence financial, health, environmental, and moral judgements and decisions.
